FOR IMMEDIATE RELEASE

December 2, 2019

Carbon monoxide detectors have been installed in all our schools.

Timmins, December 2, 2019 – The Conseil scolaire catholique de district des Grandes Rivières is proud to inform you that all its schools are now equipped with a series of carbon monoxide detectors. Although the Ontario Building Code does not require this security measure for institutional buildings, the School Board decided to add this additional security measure.

Carbon monoxide alarms are designed to sound an alarm before the concentration of carbon monoxide in the ambient air is dangerous to your health.

The safety and well-being of everyone is a priority for us and we want to prevent possible carbon monoxide poisoning.
